A massive occupation of the central Med

We fight for freedom of movement for all, without conditions

We are preparing a massive sea occupation mid-September 2025, south of Lampedusa and connected actions in cities around the Mediterranean sea.

The central Mediterranean sea has become a highway for weapons and goods, and a graveyard for people. **This is because of Fortress Europe: a racist, capitalist and neo-colonial project.** Wall after wall, pushback after pushback, fortress Europe has never been more hostile to freedom of movement.

The normalization of this space has turned thousands of deaths into numbers, cumulating year after year. **They managed to let us believe that the border system is the only possible,** realistic, serious one: a system that has snaked itself into our heads and hearts **to justify violence** and make it invisible: passports, papers, visas create a logical framework that logically extends into **deportations, pushbacks, externalized lagers and internal borders.**

Freedom of movement is intersectional with other struggles. Together, we refuse the idea that the world where we live is normal and **we want to project a radically different political horizon to build another present.**

It is on you now

The initiative aims to be a mass event, involving as many people and boats as possible ! **We need to be multitude to occupy a considerable portion of the sea, take back public spaces in our cities, stand behind a radical vision for freedom of movement!**

We are horizontal, grassroots, spontaneous. **Can you join us?**

You can follow us and reach out to us through our website flotta.noblogs.org
